

YTS (Your-economy Time Series) Aggregated Data

We custom run establishment data aggregates from the Your-economy Time-Series (YTS) database from 1997 to 2017. BDRC offers **two (2)** tiers for the aggregated establishment data.

Tier 1 - Custom Records

Custom records refers to data requests that are constructed for you by BDRC choosing regions that meet your specific criteria from these options: region (county, CBSA, states, zip codes), period (years), industry (2, 3, 4, 5, or 6-digit NAICS), and employment size.

Regions	Without NAICS	By NAICS
3 or Less	\$350	\$550
4 to 15	\$950	\$1,250
15 to 25	\$1,350	\$2,500
26 to 50	\$2,000	\$3,750
*Define Scope (starts)	\$750	\$1,200

- Due to the run-time volume of **6-digit NAICS**, BDRC limits these to **15**
- BDRC will work with you to “define a scope” for any project and perform the research on your behalf

Tier 2 - Static Regions

Static regions on YE includes states, CBSA (Metro regions), and all counties across the U.S.

Region	1 to 25	26 to All	1 to 194	195 to All	1 to 1,567	1,567 to 3,134
States:	\$250	\$500	-	-	-	-
CBSA			\$375	\$750		
Counties	-	-	-	-	\$475	\$950

BUSINESS CONTACTS WITH ADDRESS

YTS aggregate data does not include *business contact* information. You can purchase the latest contact information for any business and receive current info: company name, address, phone, owner or officer, and management members if available.

- Up to 5,000: \$.15 cents each
- 5,000 plus: \$.10 cents each

DELIVERY

Metrics: Total, Resident, Nonresident, Noncommercial business types cut by:

- 5 employment stages (self employed, 2-9, 10-99, 100-499, 500+)
- Churn Parameters: birth (divided by new and existing starts) death, expansion, contraction, move in, and move out

Both tiers will contain establishments, jobs, and sales delivered in an Excel spreadsheet. Churn parameters are not available for sales. [Download](#) metric variables list.
